PROFESSIONAL SUMMARY

Full-stack developer with 3+ years shipping production web, mobile, and API systems end to end. Currently lead developer of a UAE healthcare booking platform connecting patients with 150+ verified doctors across all seven Emirates: a 446-endpoint NestJS/PostgreSQL API behind a React SPA, a NextJS site, and a React Native app. Cybersecurity engineering background applied to building secure, observable systems on Azure.

TECHNICAL SKILLS

Languages: TypeScript, JavaScript, Python, PHP, SQL
Frameworks: NestJS, Node.js, React, NextJS, React Native/Expo, FastAPI, Express.js, Symfony
Cloud & Databases: Azure, AWS, AWS Lambda, Google Cloud, Firebase, PostgreSQL, MongoDB, MySQL, Redis, Prisma
DevOps & Tooling: Docker, Kubernetes, Jenkins, PM2, Git, Playwright, Prometheus, Grafana, n8n
Security: RBAC, JWT/OAuth, DevSecOps, SIEM (Wazuh), Vulnerability Assessment

PROFESSIONAL EXPERIENCE

- HorizonLux

Full-Stack Engineer

January 2026 - Present

Tabeebi - UAE Healthcare Booking Platform (tabeebi.ae)

 - Led development of a production healthcare booking platform: a NestJS/Prisma/PostgreSQL API exposing 446 REST endpoints, serving a React SPA, a NextJS marketing site, and an Expo/React Native mobile app
 - Implemented a 14-status appointment lifecycle, anonymous slot-hold reservations, and multi-tier appointment reminders on Redis/Bull background queues
 - Integrated 14 external services: Postmark/SMTP email, D7 SMS, Expo Push, Infobip WhatsApp, Azure Blob and S3 storage, and Google Maps, with full English/Arabic i18n
 - Designed multi-role RBAC across six user roles (patient, practitioner, secretary, operator, owner, super-admin) with JWT and Clerk authentication and a partitioned audit trail with anomaly alerting
 - Deployed and operated the platform on Azure: PM2 cluster, Key Vault-backed secret management, and Application Insights monitoring with alerting and a platform-health dashboard
 - Cut production disaster recovery from 1 hour to under 5 minutes by replacing an ad-hoc process with infrastructure-as-code and a scripted rebuild, proven twice under real production failure
 - Authored 260 end-to-end test scenarios spanning auth, booking, and all five role dashboards across web, mobile, and API, catching defects before release; load-tested the API to a 9 ms median and sub-300 ms p95 response time under 50 concurrent users
 - Automated the import of 40,000+ practitioner records from UAE government directories (DHA, MOHAP, TAMM) with a TypeScript/Playwright scraper, replacing manual data entry with a staged review-and-promote pipeline
- MMI (Industrial Manufacturing Company)

Full-Stack Platform Developer

April 2025 - October 2025

Industrial Management Platform

 - Architected an open-source industrial web platform (React/TypeScript, Express.js, MongoDB, FastAPI) with ERP/CRM modules for machine management, order tracking, inventory, and client relationships
 - Built an AI-powered recommendation engine with TF-IDF embeddings for machine and product search
 - Integrated RBAC, JWT authentication, and Wazuh SIEM, with Prometheus/Grafana monitoring for system health and performance
- Onrttech

AI Callbot Platform Developer

January 2025 - March 2025

Echoparrot

 - Built a realtime AI callbot API integrating OpenAI, Twilio, and Speechmatics for live call handling and transcription
 - Developed a NextJS web app for managing client numbers, AI scripts, and RAG resources
 - Deployed to AWS Lambda serverless functions behind Nginx, with monitoring and logging via AWS CloudWatch
- Onrttech

Health Companion Mobile App Developer

June 2024 - September 2024

Vitaminurse

 - Built barcode scanning and search over a product database of 600k+ items
 - Implemented an OpenAI-powered recommendation system for personalized product suggestions
 - Developed multi-parameter filtering for dietary and health preferences (calories, allergies, vegan, gluten-free) in React Native over a Node.js/MongoDB backend

EDUCATION

ESPRIT School of Engineering, Tunis, Tunisia | Cybersecurity Engineering Degree September 2020 - November 2025

CERTIFICATIONS

ISO/IEC 27001 (2025) | Fortinet NSE4 (2024) | Hedera Hashgraph Developer (2024) | CISCO CyberOps (2023) | CISCO CCNA (2023)
